**PART 1:** Review Comments

<u>Compulsory</u> REVISION comments	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The topic is interesting and important. However, this particular manuscript may not be the one that will enlighten business and academic society on the topic. I do not see enough data to proof the significance of this research outcomes.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	The numeration of the sections makes no sense. If Literature review is 2., why Conceptual Framework is 2.3?	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	I am not sure if conclusions can be drawn from investigation of the 4 firms only. Also, assessing CEO’s quality from age and nationality perspectives only seems not enough to me. What about industry experience, education, networking, leadership style, etc...	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		
<u>Minor</u> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?	The paper has lots of grammar mistakes. Professional editing is required. Also, the author has to decide on the format – current way of citing and referencing is a mix of different styles. Author has to decide on one style and to follow.	
<u>Optional/General</u> comments
